DARK ORANGE SKIES OVER BAY AREA

The current dark orange skies are caused by a combination of fog and wildfire smoke ([Please see a video message from Mayor Breed here](#)). While this unexpected daytime darkness may look frightening, it is currently safe to work and to be outside.

The current wind patterns are keeping smaller smoke particles up high and blocking the sunlight. Air quality at ground level is current-

ly at moderate levels. Our COVID-19 face coverings provide some protection from the larger ash particles that are reaching ground level. While the air quality is currently at safe levels, there is reduced visibility outside. Please take caution while driving or walking.

If the wind patterns change, we may see a drop in air quality. In this scenario, City departments and employees will be instructed about what they need to do to stay safe. Please respond to DSW alert messages, monitor Air Quality and get other safety updates at sf72.org and by signing up for [AlertSF](#).

Thank you for all you do for San Francisco.

Discount Spotlight

Potrero Grill, located in International Terminal G marketplace, pre-security. American food featuring soups, salads, pizza, sandwiches, and hamburgers with beer and wine.

Order ahead: 650.821.7404

PHOTOS OF THE WEEK: DARKNESS AT DAYTIME

A combination of fog and wildfire smoke created some dramatic skies above SFO, and the rest of the Bay Area, this week. The wind patterns kept smaller smoke particles up high, which blocked the sunlight, but also kept the air quality at ground level to moderate levels.

Who Knew?

Did you know that SFO recently deployed six 40-foot all-electric zero-emission buses and related electric vehicle charging infrastructure? The buses replace six renewable diesel buses in the regular operating fleet and will result in the elimination of more than 23.7 million pounds of greenhouse gas tailpipe emissions over the lifetime of these vehicles.

2020 CENSUS

Have you filled out your 2020 Census? In San Francisco, 150,000 households have not yet completed the census, and the deadline is less than 4 weeks away.

The census is incredibly important to our daily lives, and the results of the 2020 Census will affect each of us and our region for the next 10 years. As outlined in the U.S. Constitution, we conduct a census every 10 years to count every person living the US and the five U.S. territories. Our country has been collecting this data since 1790!

The data from the census guides lawmakers, business owners, teachers and many others in how they provide services, products and support for us and our community. This includes informing the distribution

of more than \$675 billion in federal funds to states and communities each year for things like health care, food assistance, and infrastructure. The results of the census also determine the number of seats each state will have in the U.S. House of Representatives, and they are used to draw congressional and state legislative districts.

Thanks to those who have already completed the 2020 Census. If you haven't responded yet, it is easy to complete online at 2020census.gov, by phone, or by mail. It takes just a few minutes and your responses are strictly confidential.

Visit my2020census.gov to begin. You can complete the census online or by phone in 13 different languages: English, Spanish, Chinese, Vietnamese, Korean, Russian, Arabic, Tagalog, Polish, French, Haitian Creole, Portuguese, and Japanese.
